SKILLS

React | JavaScript | Redux | Firebase | Rest APIs | Nextjs | VITE | Tailwind CSS | jQuery

SUMMARY

Frontend Developer with 2.5 years of hands-on experience building responsive and scalable web applications using React, Redux, Firebase, and Tailwind CSS. Skilled in routing (React Router), testing (Jest, RTL), and modern frameworks like Next.js. Adept at writing clean, maintainable code and working in fast-paced, agile teams.

WORK EXPERIENCE

EasyInsights, Delhi, India — **Front End Developer**

Sept 2022 - Oct 2024

- Developed and maintained multiple screens for a SaaS analytics platform, including a Data Sources screen to authorize and manage marketing accounts (e.g., Facebook, Zoho, Google Analytics) with search, edit, and filter capabilities.
- Contributed to multi-team workspace management by developing views showing team usage stats and supporting dataview duplication, data blending, alerts, metrics across workspaces.
- Built a dynamic homepage dashboard with key widgets and role-based navigation logic tailored to user workspaces and teams.
- Implemented smooth user experiences with loading animations, custom date ranges, search functionality, and dynamic table features with pagination, sorting by name, role-based filtering.
- Took full ownership of the second product's frontend — developed every screen, navbar, form, and table with a mobile-first approach, without any pre-provided design, relying on product needs and UX best practices.
- Added unit tests using React Testing Library and Jest.

EasyInsights, Delhi, India — **Front End Developer Intern**

Jun 2022 - Aug 2022

- Worked on EasyInsights.ai website pages, implementing mobile-responsive layouts for improved user experience on smaller screens.
- Gained hands-on experience with class-based React components, contributing to legacy parts of the application.
- Converted several pages from Material UI components to semantic HTML elements for better control over styling and performance.

PROJECTS

Finance Manager — *React, Firebase*

[Project Link](#)

- Built a full-stack expense tracker using React.js and Firebase Firestore. Implemented Google OAuth for secure authentication and user session persistence.
- Designed reusable components and custom React hooks for transactions and balance logic. Added Excel/CSV import for bank statement parsing and transaction ingestion.
- Integrated Chart.js for interactive charts with category-wise breakdown. Enabled manual balance editing, category customization, and date range filtering in a responsive UI.

Document It (Google Docs Clone) — *React, Firebase*

[Project Link](#)

- Document It is a CRUD (Create, Read, Update, and Delete) based app made from scratch using ReactJS.
- It is a collection of docs stored and shared online. The data is stored and updated using Firebase's Firestore Database.

EDUCATION

BCA, Vivekananda Institute of Professional Studies, Delhi

Aug 2019 - June 2022
